

1. Car Wireless Charger Manual

Product Name: Car stand Wireless charger

(Intelligent sensing)

Power: 15W, 10W, 7.5W

Effective transmission distance: 1-8mm

Size: Middle disk diameter: 115mmx60x5mm

Charging interface: Type C

Packing list:

Car bracket x1, Manual x1

Data line x1, Car outlet base(clip) x1

Magnetic headx1 (iPhone, type-C, Android)

Magnetic suction head x 2

2. Specifications

1. Color: Blue / Black / White / Gold
2. Weight: product net weight about 117g
3. Material: ABS + silicone + alloy
4. Wireless output power: 5V/2A, 9V/1.67A
5. Output power: 15W
6. Magnetic output power: 66W
7. Charging distance: 0-8mm
8. Support Specifications: Qualified with Qi Wireless Protocol Charging
9. Support QC wireless fast charging equipment such as iPhone8, iPhone X, iPhone8 plus, Samsung S6, sedge, S7, Sedge, s8, s8+, s9+
10. Devices that do not support wireless charging need to purchase Qi-compliant wireless receivers before they can be used
11. When fully charged, electric switch on and off can be used even without power supply.
12. K1 only supports electric opening and closing and infrared induction opening and closing. (K3+, K5+) does not support magnetic 66W fast charging.

3. Product display

3. Instructions For Use

1. Connect the vehicle's wireless charging device to the appropriate data cable when using it.
2. Connect the USB port of the data cable to the charging interface on the car. The actual output shall prevail. (eg. cigarette lighter switching charger and USB charging port on the car)
3. The device clip clips the air outlet and can also be placed elsewhere
4. After the device is powered on 5V/9V DC power supply, it will automatically check the tension and the blue indicator light will be on. When the object is close to the device 5cm-20cm, the automatic induction will open the arms and put the phone into the phone. The device will automatically clamp the phone. At this point, wireless charging will automatically charge the phone. (mobile phone with wireless charging function) when you remove the phone you need to touch the back of the shell at the top of the sensing point, when the hand touches the sensing point position, the device automatically open double Arm, remove the phone
5. This device has over-voltage protection, over-temperature protection, magnetic field protection, short-circuit protection if the device is abnormal, it will automatically stop working

4. Precautions

1. Do not over-squeeze or hit the device
2. Do not use the wireless charger under severe high temperature, humidity or corrosive environment to avoid damaging the device's circuit
